Support for Identified Schools

Please describe how the LEA has or will support its eligible schools in developing CSI plans.
Planning began in the spring, at the same time of Covid 19 school closures. This created a rather unique challenge in bringing people together to collaborate. District Office staff met online with the site principal and the site principal met online with his staff. Working together over the course of several monthly meetings, the team identified a need for targeted teacher support. The team felt this would have the greatest impact on student academic achievement. Thus the role of Academic Coordinator was developed. The Academic Coordinator role began in August 2020 with the following responsibilities: Work whole group and one-on-one with staff to develop, implement and refine effective teaching practices that result in increased achievement; review student achievement data and use it to drive one-on-one coaching conversations with teachers; research and bring professional development opportunities to staff.

Monitoring and Evaluating Effectiveness

Please describe how the LEA will monitor and evaluate the implementation and effectiveness of the plan to support student and school improvement.
To determine the effectiveness of the CSI plan on student achievement, the site team will meet at the end of each trimester to review student data which includes placement tests, local assessments, grades, graduation rates, suspension

rates and CAASPP scores. Accounts and observations by the Principal, Academic Coordinator and other teaching staff will also determine progress, student growth and effectiveness.
