

Questions	Response
Based on what we read in the plan, our kids will possibly be getting all new teachers because we chose to continue with Distance Learning. To us, it seems very disruptive to switch all the teachers in the middle of the school year. We have children with special needs and my wife is in constant contact with their teachers to get accommodations and such. Having to rebuild those student/teacher and parent/teacher relationships is going to add stress to what already is a less than ideal and stressful education experience. What is the District and WCR staff going to do to help this transition be as smooth as possible?	Keeping students with their current teachers is a priority for us as a district. In some cases this may not be able to be avoided. Please feel free to contact your school site for more information.
What is the District going to do if there is a major outbreak? Will all students go back to Distance Learning?	The district will work in conjunction with the Sacramento County Department of Health to determine the appropriate course of action based on the current conditions in the county.
Is November and flu season the best time to do this? When the rest of the Sacramento school districts have decided to start later in the year, why do we need to reopen months before? What's the rush?	The decision was made to begin in-person instruction on January 5, 2020. The district will continue to monitor the situation and work with the Sacramento County Department of Health.
Does a student who signed up for hybrid in-person learning, have the option to distant learn until after the winter break?	All students will continue in distance learning until January 5, 2021.
What are other Sac County schools doing about reopening their schools?	Only three other districts have decided on dates to reopen. Twin Rivers and San Juan school districts have chosen January dates and the Folsom-Cordova district has decided on a November date.
If the MOU is not signed or if the teacher's union does not agree to the Nov 9th start date what are the alternatives? OR is there another plan for instruction?	The decision was made to begin in-person instruction on January 5, 2020. MOU negotiations are continuing as scheduled.
will the teachers change in the cohort program	More cohorts/Learning Hubs are in the planning stages to begin in the coming weeks. We will also prioritize keeping all students with their teachers but some may have to change.

What will happen to classified employees if we return at a later date in Jan ?Like Transportation will we continue to work on site before Jan?	Transportation Dept. will continue in the same status as they are today.
How are students being assigned to blue and gold groups?	Intially we are dividing the students by alpha but other adjustments may need to be made to account for families or other circumstances.
Why has McClellan not been addressed in the presentation?	McClellan High School is small enough that students are able to return to their normal schedule. Those students who choose full-time distance learning will be participate live, online through synchronous learning.
I know that we will be following CDC guidelines, but is there a possible way for us to put a link to most asked questions with the answers for parents to get to quicker than having to read through the playbook, or the CDC guidelines? I know that a lot of parents have many questions, but won't have the patience or time to read through everything to get the answers they possibly are asking. Such as face masks, going to the flu season how we're going to handle children with common cold symptoms etc	The Frequently Asked Questions page can be located at FAQ
If a teacher has requested to remain on distance learning who will be in the classroom with the students on campus?	If the request is approved by Personnel, the classroom would be supervised by a credentialed substitute or a other district personnel.
What is the exact licencing does the health care professional need?How are you going to determine students online get the same type of education as those in class. Subjects of Concerns - science - math	Click on this link for the Health Techician job description. We are continually analyzing this topic and working to ensure consistency between both programs.
I feel as though you haven't heard student opinions? Why haven't you polled actual students to see how we would like to learn online or not? You could at least ask high school students.	We conducted a survey with every family to determine their choice.
Why can we not come back to school early, there are students having trouble learning online and they do better in learning in an in-school environment?	We are increasing our Learning Hubs/Cohorts to try to address this concern. These hubs will allow us to bring some of our most specialized populations back to campus.

<p>Will there be a parent choice for am or pm selection for on campus at Riles?</p>	<p>At this point, we can not accomodate all requests. However, our current plan will likely be only having an AM session.</p>
<p>Why is it that when questions or concerns are posed to the board via comment section during the meetings, there is no follow-up for resolution if there is no immediate answer or response? I.e. last month there were concerns that were brought up about distance learning and camera use... This is just one example, but isn't the first time I have noticed this during meetings. Unfortunately the lack of follow-up to things that are brought up by parents, etc, make the board/district-appear as though there is no concern.</p>	<p>Thank you for bringing this point up. We work very hard to respond to all inquiries. We hope this FAQ will help help with your concern.</p>
